

Gary V Merriman Jr.

U.S. Citizen | Texas City, Texas | (404) 859-5245 | merrimandev91@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#)

Throughout my career, I have honed my skills in management, and optimizing operational efficiency. My experiences have equipped me with a foundation in strategic planning, problem solving, and leadership. However, I have always been drawn to the dynamic and innovative nature of software development. I have embarked on a journey to transition into this field by going back to school for software development. I have undertaken extensive training and completed multiple projects to develop my coding skills. My management background provides me with a unique perspective on project execution and team collaboration, which I believe to be invaluable in a software development role. I am eager to leverage my management expertise along with my new technical skills to contribute to and grow within a forward-thinking tech company.
